Dear Mr. Weisberg,

My name is Beau Stricker. I am a bood friend fo Mr. Kevin Heling of Sheboygan. He was a student of Dr. Dave Wrone in Stevens Point. Mr. heling told me that you were on of the members of the Warren Commission, investigation the assassination of President John F. Kennedy. He is on of my biggest heros. I would really like to know some things about the case that I Couldn't figure out. If you don't mind, I would like to ask you some questions about the assassination.

First, I would like to know what you thought about the autopsy, that was performed. Was it really true that some rookie doctors performed the autopsy? Whay weren't there professionals doing the operation? How could someone not see the position of the bullet holes on Kennedys back and neck area? How could you miss the position of the bullet holes by a number of inches? Did you take into consikeration the testimony of the doctors at Parkland Hospital? Please explain to me the questions I have asked in this paragraph.

Next, I would like to ask about the "Magic Bullet" theory. Do you really think that this could have really happened? HOw could a bullet actually travel through two people without damaging the bullet? Did the commission take into consideration the findings of the FBI bullet tests? There is no way that this could gave happened.

The last point I would like to ask about is the question that everbody probably asks. Do you think that there was a second hun man, or was Oswald the lone gunman? In my strict opinion, there is just to much evidence that states that there were two gunman. There is no way that the bullet that struck Kennedy's came from Oswald's gun. When Kennedy passed the grassey knowl, the seconk gunman fired and struck Kennedy in the back of the head.

I would really like tou to write back to me as soon as possible. I need this letter for my frference for my paper on the assassination of John F. Kennedy.

My address is:

Sincerely,

Beau M. Stricker
